PROFESSIONAL SUMMARY

I am a dedicated Cybersecurity Analyst and Full-Stack Developer with an MSc in Cybersecurity & Digital Forensics. Over the past five years, I have focused on building secure, reliable software and managing large datasets that keep municipal operations running smoothly. I love bridging the gap between technical security—like threat detection and data protection—and the real-world business value that helps organizations make better decisions.

CORE COMPETENCIES

- **Cybersecurity:** Security Operations, Incident Response, Threat Intelligence, Network Security, Digital Forensics, Data Privacy (GDPR/Data Protection).
- **Engineering:** Full-Stack Development (React, Node.js, Firebase, MongoDB), Python, TypeScript, SQL, Git/Vercel.
- **Data Science:** Statistical Analysis, Power BI, AI/ML (CNN Architectures), KoboToolbox, Data Visualization.

PROFESSIONAL EXPERIENCE

Municipal Statistician | Bekwai Municipal Assembly *Nov 2023 – Present*

- Led the development of the Bekwai Municipal Revenue System, a custom platform designed to streamline tax management and business permits.
- Took responsibility for the security and integrity of over 100,000 citizen records, ensuring compliance with strict privacy protocols.
- Built interactive dashboards that reduced decision-making delays and improved budget accuracy by 30%.
- Created digital mapping tools that enhanced revenue collection visibility across municipal communities.

Zonal Data Quality Monitor | Ghana Statistical Service *Dec 2023 – Apr 2024*

- Managed data security and quality across 288 areas, maintaining information security and accuracy during field operations.
- Trained 188 staff members on secure data handling best practices, reducing reporting errors by 50%.

Assistant Statistician | Local Government Service *Jan 2022 – Aug 2023*

- Focused on transforming raw data into clear, actionable reports and dashboards for executive leadership.

Data Analyst Intern | SSNIT *2019 – 2020*

- Validated data integrity and automated repetitive reporting workflows using Excel.

SELECTED PROJECTS

- **mySOC (Security):** Built a dashboard for real-time threat detection, utilizing intelligent integrations to accelerate incident response times.
- **CivicMind AI (Governance):** Developed an AI-powered platform to track revenue and departmental performance metrics.
- **Network Scanner (Security):** Authored a Python tool for proactive network vulnerability assessment and security reporting.
- **ProAssess AI (Dev):** Built a recruitment platform prioritizing secure authentication and robust data-handling workflows.

EDUCATION

- **MSc Cybersecurity & Digital Forensics**
- **BSc Statistics**, Kwame Nkrumah University of Science and Technology

CERTIFICATIONS

- Google Cybersecurity Professional Certificate
- Certified Cybersecurity Educator Professional (CCEP)
- IBM Respond & Mitigate Security Threats
- Mastercard Cybersecurity Job Simulation
- Power BI Data Analytics Virtual Experience (Forage)
